

Programming Smart-ClimaSens

Download and install Arduino IDE from the official homepage.

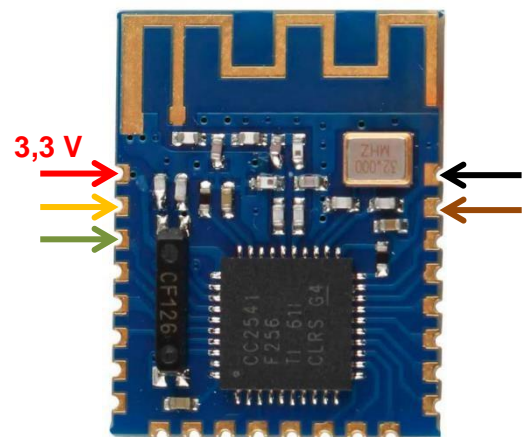

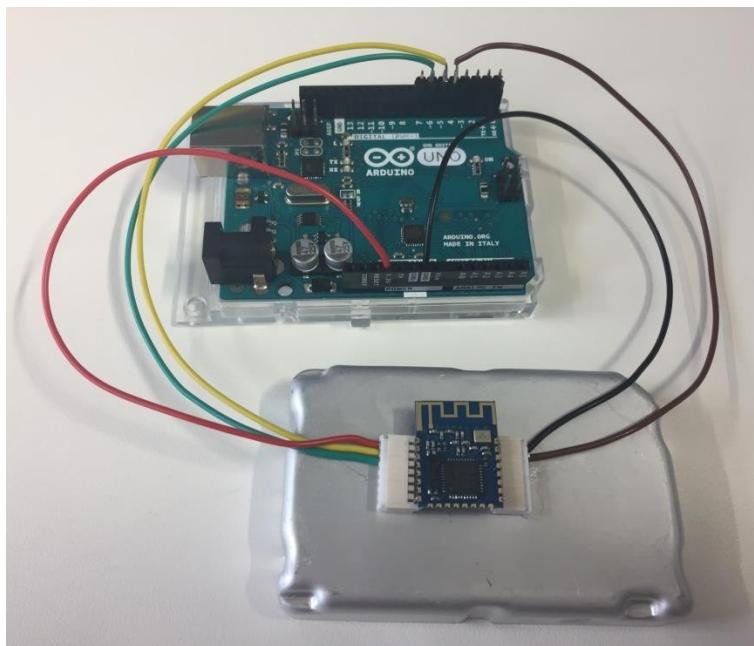

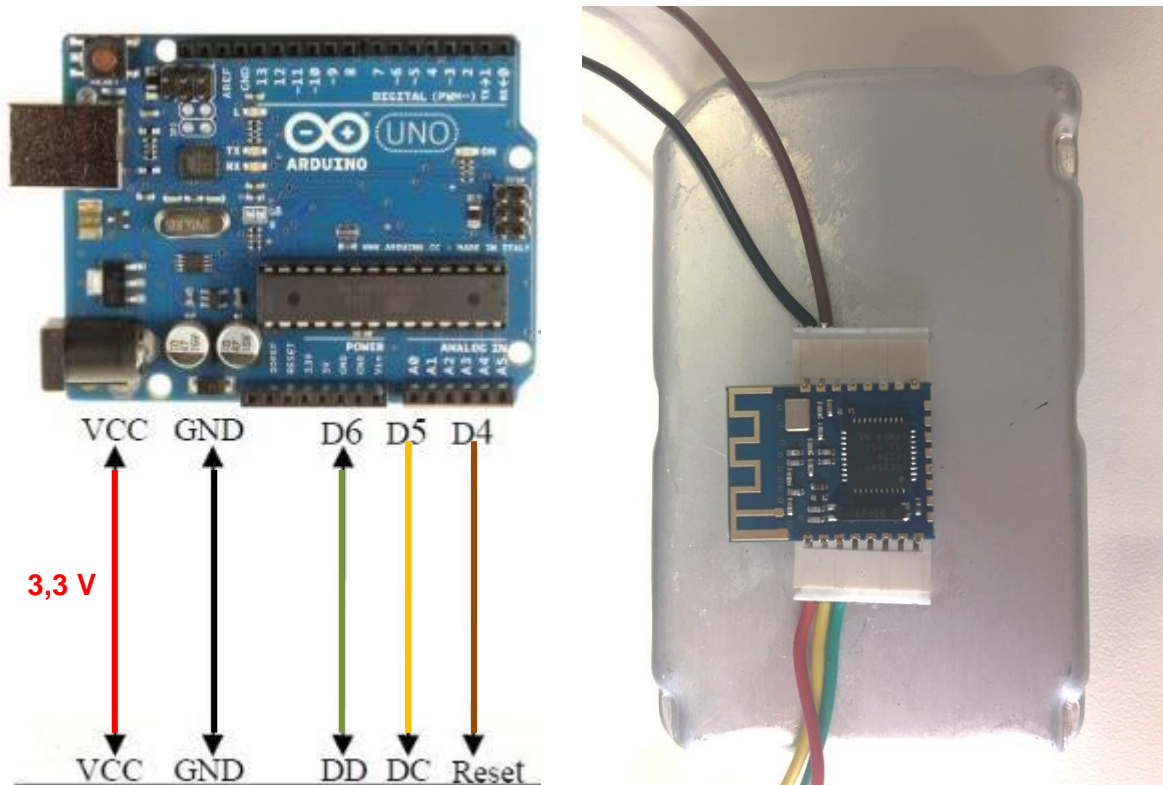

<https://www.arduino.cc/en/Main/Software>

Start Arduino IDE and load the “CCLoader.ino” sketch.

„Smart-ClimaSens/Development/Development-Tools/Programming
software/CCLoadermaster/Arduino/CCLoader/CCLoader.ino”

Connect your Arduino to the computer and start loading the sketch.

Connect your Bluetooth module to the Arduino.

Find out the COM-Port of the Arduino.

Open the "ConvertAndProgram.bat" and change the COM-Port to yours.

CCLoader.exe **YourComPort** SimpleBLEBroadcaster.bin 0

Execute "ConvertAndProgram.bat", the programming should start.
